Is it GLUTEN FREE ? Is any Basic Diet Guide for Celiacs and Others Who Have to Avoid Gluten ?... Getting the Basic Gluten-free Diet right is easy when you know the Ground Rules. A Gluten-free Diet (GFD) is a Diet that strictly excludes Gluten, a mixture of Proteins found in Wheat and related Grains, including Barley, Rye, Oat, and all their Species and Hybrids. Gluten causes health problems for those with gluten-related disorders, including celiac disease (CD), non-celiac gluten sensitivity (NCGS), gluten ataxia, dermatitis herpetiformis (DH) and wheat allergy... Gluten Proteins have Low Nutritional and Biological Value, and the Grains that contain Gluten are not essential in the Human Diet. However, an unbalanced selection of Food and an incorrect choice of Gluten-free replacement Products may lead to Nutritional Deficiencies.

Many commercially available Products are labeled 'gluten-free,' but there will be some that are not ; this is why Proper Label Reading is important. It is also important to remember that 'wheat-free' does not necessarily mean 'gluten-free.' Be wary, as many Products may appear to be Gluten-free, but are not. As a rule, Traditional Wheat Products such as Pastas, Breads, Crackers, and other Baked Goods are not Gluten-free. However, there are many Gluten-free Options available that use Alternative Flours and Grains.

Soups and Sauces are one of the Biggest Sources of Hidden Gluten, as many Companies use Wheat as a Thickener. It is always a good idea to read the Label of any pre-prepared or Canned Soups and Sauces, paying special attention to those that are Cream-based. Fresh and Frozen Fruits and Vegetables are naturally Gluten-free. However, it is important to read Labels on any Processed Fruits and Veggies, as well as Dried Fruit and Pre-prepared Smoothies. Most Beverages are Gluten-free, including Juices, Sodas, and Sports Drinks. Alcoholic Beverages, including Wines and Hard Liquor/Distilled Liquors/Hard Ciders are also Gluten-free....
